

## Arduino Programming Club 2023-2024

Dear parents,

We are excited to announce that our school has become a part of the **Let's Start Up** network, connecting with **advanced engineering clubs**. Our new Arduino Programming Club, designed **for ages 11-16**, will provide an enriching experience for your children beyond regular school hours. This club aims to equip students with comprehensive insights into programming, mechanical engineering, and electrical engineering. Through engaging in intricate engineering projects, your children will have the opportunity to enhance their skills and knowledge.

## Approved by engineers and aligned with international standards
