

Young Engineers Club

2023-2024

Dear Parents,

Get ready for another year of innovation and excitement at the BIST Young Engineers Club, brought to you by Let's Start Up! Our mission is simple: to provide **children aged 5-10** with an unforgettable journey into the world of engineering.

Shaping Young Engineers, Building Future Innovators!

Real-World Discovery

Our approach lets kids apply classroom knowledge to real-world projects. Using top-notch engineering tools, they'll create projects that showcase their newfound skills.

Unleash Creativity

From constructing engineering marvels to exploring green energy and smart systems, we encourage imaginative thinking. Our projects are educational and cherished keepsakes.

Comprehensive Learning

Our curriculum covers diverse topics such as green energy, circuits, smart home systems, and more. Through our special method, kids progressively build knowledge, skills, and abilities.

Engineered Excellence

Engineers and educators designed our curriculum, drawing inspiration from top engineering institutions worldwide. We're committed to nurturing both understanding and intellectual growth.

This Semester's Highlight:

Rescue Boat
